Privileged to deliver 2 x **KlinMak Srl** Hilex 8065 ATEX Zone 1 ride-on scrubber dryers this week to a leading pharmaceutical company in Ireland. 🇮🇪

After working on this project for over a year, it was fantastic to see these two machines finally arrive on site and go into operation.

What makes this delivery even more significant is that these are the first Hilex 8065 machines of their kind to be sold globally for this application.

A big thank you to **EUGENIO CAGNA** from **KlinMak Srl** and **EXCEN | ATEX TECHNOLOGY** for your involvement in this project.

The Hilex 8065 is a battery-powered ride-on scrubber dryer designed specifically for use in hazardous environments, including:

- ✓ Gas Group IIB – Zone 1 / EPL b
- ✓ Combustible Dust Group IIIC – Zone 21 / EPL b
- ✓ Can be operated and charged within a Zone 1 hazardous area
- ✓ Suitable for dust with MIE > 10 mJ
- ✓ Suitable where dust ignition temperature is >125°C
- ✓ Designed in accordance with ATEX Directive 2014/34/EU

The ability to both use and charge the machine within a Zone 1 area is a major advantage for pharmaceutical, chemical and industrial facilities where standard cleaning equipment cannot be used.

A lot of work went into getting these machines specified, approved and delivered, so it was a very satisfying moment to finally see them on site. A great milestone for **CleaningMachines.ie**, and another example of the highly specialized cleaning equipment we can provide to customers operating in some of Ireland's most demanding environments.
